| <b>TEST METHOD CONDUCTED</b> | AATCC 138 Cleaning - Washing of Textile Floor Coverings |
|------------------------------|---|

| DESCRIPTION OF TEST SAMPLE |                            |
|----------------------------|----------------------------|
| <b>IDENTIFICATION</b>      | Highline 80/20 1400 ECT350 |
| <b>CONSTRUCTION</b>        | Cut Pile                   |
| <b>BACKING</b>             | Attached Cushion           |
| <b>REFERENCE</b>           | Modular Collection         |

### GENERAL PRINCIPLE

This method is intended to determine the effect of shampooing on the colorfastness properties of the textile floor covering. The test specimen is subjected to complete saturation with water, hand scrubbed with a nylon bristle brush, and detergent solution, followed by rinsing and drying. By comparing the shampooed sample to an original "control" sample, any color change which may have occurred is assessed and rated by means of the AATCC Gray Scale for Evaluating Change in Color.

### TEST RESULTS

|                             |     |
|-----------------------------|-----|
| <b>TEST SPECIMEN RATING</b> | 4.0 |
|-----------------------------|-----|

| AATCC RATING KEY |                     |
|------------------|---------------------|
| 5                | No change           |
| 4                | Slight change       |
| 3                | Noticeable change   |
| 2                | Considerable change |
| 1                | Severe change       |
